

INFORMATION REQUIRED FOR SEED INTRODUCTION/
IMPORTATION INTO THE TERRITORY OF REPUBLIC OF INDONESIA
(To be finished by Seed producer, owner of the variety or grower)

1. Common name :
Botanical name :
2. Name of variety/Cultivar :
3. Type of variety (choose one) : hybrid ; pure line ; synthetic ; clone
4. Genome Status (choose one) : transgenic ; non transgenic
5. Status of variety/cultivar (choose one) : protected
non protected
6. Protection type (enclosed if any) : Variety Protection No.
Patent No.
7. The origin of seed
 - a. Where and when the seed is produced (finished to be processed) ?
.....
 - b. Where (country, state, town) and when the variety is released?
.....
8. Exporter
 - a. The origin country of sender / exporter?
.....
 - b. Name and address (phone, fax, email/telex) of the company/
producer/person?
.....
9. Importer
Name and address (phone, fax, email/telex) of the company/producer/
person
.....
10. Type of seed (choose the one):
 - a. Grain seed
 - b. Seedling
 - c. Vegetatively propagated seed (bulb, tuber, rhizome, or others if any)
11. Specific characteristics of novelty of this variety, if any please describe
 Yes
 None
12. General information for growing this variety
 - a. Suitable temperature range :
 - b. Suitable day length (if required) :
 - c. Days from planting to first harvest:
 - d. Suggested for plant spacing :
 - e. Population of plants per 100M2 :
 - f. Yield or productivity (if available) :

13. Pests and diseases :

a. Main pest in this growing area :

b. Main diseases in growing area :

c. Main weed in growing area :

If abc available, please describe :

- Tolerance (T) or susceptibility (S), if any.....

14. Seed quality

a. Purity : (%)

b. Water content (for grain seed) : (%)

c. Germination (for grain seed) : (%)

d. Expired date :

.....date.....

Company / producer :

Signature producer :

KOP
 NATIONAL PLANT PROTECTION ORGANIZATION (NPPO)
 DARI NEGARA ASAL

TECHNICAL INFORMATION FOR COMMODITY(S) PROPOSED EXPORTING TO INDONESIA
 SUBMITTED TO INDONESIA AGRICULTURAL QUARANTINE AGENCY

1. The NPPO (National Plant Protection Organization)
 - 1.1. Country name
 - 1.2. Address of the NPPO
2. Information of crop
 - 2.1. Scientific name :
 - 2.2. Common name :
 - 2.3. Variety :
 - 2.4. Plant product proposed to be expected : (fruit, seed, leaf, setem, etc.)
3. Production Area
 - 3.1. State, Region, Province, District, etc. :
 - 3.2. Map of the Area (in detail) :
 - 3.3. General climantic condition :
4. Cultivation Information
 - 4.1. Internal legislation has been applied (e.g pest free area, control measures/requirements, etc.)
 - 4.2. Produced from area officialy certified as pest free by NPPO (described in detail) :
 - 4.3. Spesific pest management, surveillence programs and certification schemes :
 - 4.4. Harvesting methods :
5. Current pest status of crop

Category	Scientific name and common name	Classification on (Class, Order, Family)	Plant part affected (leaves, fruits, flowers, stem, root, etc.)	Distribution	Reference	Control measures
Insects						
Mites						
Nematodes						
Fungi						
Bacteria						
Phytoplasm						
Viruses						
Weeds						
Other (if any)						

6. Packaging and storage
 - 6.1. Packing methods:
 - 6.2. Post harvest treatment(s):
 - 6.3. Storage condition:
 - 6.4. Transportation (domestic and international):
7. Export certification system (current phytosanitary certification procedures, e.g
Inspection, sampling methods, pest detection and identification.
