

**Summary of the revised Paragraph 10 of Part B of the “Quarantine Requirements for the Importation of Plants or Plant Products”:**

1. *Dociostaurus maroccanus*, *Locusta migratoria*, *Nomadacris septemfasciata*, *Schistocerca gregaria*, and *Zonocerus elegans* are absent in the Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu. In addition, they have broad range of hosts and cause crop loss. According to pest risk assessment and referring to the regulations of other countries, the above-mentioned five pests are added to the regulated pest list.
2. Importation of plants or plant products shall be subjected to appropriate quarantine treatment for mitigating regulated pests if they are intercepted. If there is no appropriate quarantine treatment for the pest, the importing plants or plant products shall be destroyed or re-shipped.
