New Phases of the border TOM Implementation

…

31 January 2024 -

- Export health certificates and phytosanitary certificates are introduced for medium risk animal products, plants and plant products imported to Great Britain from the EU & EFTA countries including Irish goods, as well as non-qualifying Northern Ireland goods.

- Introduction of pre-notification for non-qualifying Northern Ireland and Ireland origin animal products, plant and plant products.

30 April 2024 -

- Documentary checks and physical and identity checks at the border are introduced for medium risk animal products, plant and plant products imported to Great Britain from the EU & EFTA countries (excluding those goods being imported from the Republic of Ireland).

- Existing inspections of high-risk plants/plant products from the EU will move from destination to Border Control Posts.

- We will also begin to simplify imports from non-EU countries. This will include the removal of health certification and routine checks on low-risk animal products, plants, plant products from non-EU countries as well as reduction in physical and identity check levels on medium-risk animal products from non-EU countries. Pre notification will no longer be required for low-risk plant and plant products.

31 October 2024 -

- Safety and Security declarations for EU imports will come into force.

- A reduced dataset introduced for imports and use of the UK Single Trade Window will remove duplication where possible across different pre-arrival datasets — such as Safety and Security, and pre-lodged customs declarations.

From 31 October 2024 -

- The introduction of documentary and risk-based identity and physical checks on medium risk animal products, plants, plant products and high-risk food and feed of non-animal origin from the EU on the west coast of Great Britain.1

    1 The date for the commencement of physical checks for non-qualifying goods moving from the island of Ireland will be confirmed in Autumn 2023.

We have also sought to respond to stakeholder feedback to improve the wider model and provide further detail on its implementation. The BTOM now contains additional information or clarification on the following areas:

- **Risk categorisation:** We have published further detail of the risk categorisation of specific commodities for the EU. (Refer to TOM risk categorisations - UK Plant Health Information Portal (defra.gov.uk) for Plants and Plant Products).

  https://planthealthportal.defra.gov.uk/trade/imports/target-operating-model-tom/tom-risk-categorisations

- **Groupage:** We have provided further information on how we will support importers using groupage models (Refer to the Border Target Operating Model page 57)

- **Trusted Trader:** We have set out further detail on the new trusted trader pilots, the timeline for these, and details on applying for them. (Refer to page 42 for more information on Trusted Trader approach for animal products and refer to page 50 for more information on Delegated Authority Approach for Plants – Authorised Operator Status).

- **Transit movements:** We have provided further information on transit movements (refer to page 65)

- **Common user Charge:** We have added more information around the indicative charges that traders will face for government owned BCPs (Refer to page 75).The proposed CUC is for every Sanitary and Phytosanitary (SPS) consignment – Plants and Plant Products (P&PP) and Animal Products - which has entered GB through the Port of Dover or Eurotunnel Le Shuttle and is eligible for a BCP check at a government-run BCP. Defra is now reviewing all responses to the consultation and will use this feedback to inform the final policy. A summary of the responses is due to be published in the coming months.

- **IT Systems and digitised certification:** We have provided a Systems Roadmap outlining changes in IT systems (Refer to page 81) and a timeline for the roll out of digital certifications. (Refer to page 55)

- **Single Trade Window:** We have provided further information on the delivery plan and timeline for the Single Trade Window. (Refer to page 84)

- **Import of samples:** We have published information on import samples (Refer to page 40) and detailed that industry specific guidance will be provided.
